

Dental Detoxifier

***Safe, Natural Chelating Formula to Clear Toxic Residues
From Dental and Gum Areas***

Benefits of the Dental Detoxifier

- *Helps clear stagnant dental and gum areas**
- *Helps stop pain, sensitivity and tenderness**
- *Helps strengthen teeth and gums**

The Rapid Dental and Gum Detoxifier. The **Dental Detoxifier** is a safe, natural chelating formula designed to help rapidly clear toxic residues, including heavy metals such as mercury, from the dental and gum areas. Using this detoxifying formula is especially helpful to use before, during and after dental work. It also helps to clear pain and inflammation in the mouth and teeth which may occur after dental procedures.

The concept of the **Dental Detoxifier** is unique in that the formula directly comes in contact with the teeth and gums, acting as a detoxifying rinse to help gently but thoroughly cleanse the interior mouth area. Special earth compounds such therapeutic-grade clays and humates, have been used internally and externally for centuries in many different cultures to detoxify foreign and toxic substances from the human body. Today, extensive scientific research proves that these earth substances can neutralize toxic elements and safely remove them from the body, including from the dental areas.

Clinically Proven Master Formula. The **Dental Detoxifier** is a clinically proven, master formula made of therapeutic-grade volcanic clay (rich in a broad spectrum of naturally occurring minerals), unheated, grade 10 Indian shilajit (a natural mineral resin formed in India's high mountainous areas, rich in humic and fulvic acids), carbon-matrix humate (rich in humic and fulvic acids) and premium-grade Japanese coral minerals (naturally rich in highly ionized calcium, magnesium and trace minerals). These key substances are then complexed with a synergistic, broad spectrum of supportive phytonutrients and mycelial mushroom extracts to make up the Dental Detoxifier.

Pain Relief. After dental work, the **Dental Detoxifier** can help support the body's natural anti-inflammatory processes and help relieve oral pain naturally. To help relieve pain immediately after dental work, the Dental Detoxifier can be used repeatedly (every 15 minutes) for several times, if needed.

The Dental Detoxifier

Directions for Using the Dental Detoxifier

1. **Place over healthy grass.** For best results, place the closed container of Dental Detoxifier outside, directly on the ground over healthy grass or near healthy bushes for 10 minutes before use.

Note: Placing the Dental Detoxifier container over the natural earth (i.e. healthy grass) for a few minutes allows the ingredients in the Dental Detoxifier such as the unique rare earth minerals and natural “living” humic acid ingredients to absorb the earth’s natural Schumann waves, thereby accelerating the minerals’ electron orbits to higher energy states. This higher energy state is then transferred to the human body when you use the Dental Detoxifier.

2. **Mix in water.** Mix ¼ teaspoon of Dental Detoxifier in ¼ cup purifier water and mix. (Mix with a nonmetallic spoon in a nonmetallic glass.)

3. **Hold in mouth for 1 to 2 minutes.** Hold the liquid mixture in your mouth for one to two minutes. Swish mixture around in mouth a few times.

4. **Spit out mixture.** Next, spit out the mixture. Then do not rinse your mouth afterwards. A slight residue will adhere to the inside of your mouth. Leave this residue in your mouth. (It is harmless if you swallow some of it.) The natural minerals and herbs help keep the mouth alkaline and detoxified.

5. **When to Use.** Use the Dental Detoxifier upon arising. (Brush your teeth *before* using the Dental Detoxifier.) Wait at least 10 minutes to eat. Also use the Dental Detoxifier right before bed each night. In special cases, the Dental Detoxifier may also be used several times during the day.

Other Dental Support Products

1.) **Gum Support. Premier Limonene Complex and Premier Neem Oil.** (Mix 2 drops of each together in the palm of your hand and then gently massage into the gums.) The neem oil acts as natural anti-infective support while the limonene is a powerful antioxidant and helps the neem oil to penetrate deeply into the gum area.

2.) **Optimal pH Support for Healthy Teeth.** To help the body maintain its best mineral balance as well as to remineralize deficient areas, including bones and teeth, you must achieve a whole-body alkaline pH. The best way to help the body achieve an optimal pH is by taking the **Quantum Trio**, 3 key products which promote an alkaline pH. These 3 products are: Coral Legend (100% pure, Grade A Japanese coral minerals), Quantum Aloe Powder and Quantum Cod Liver Oil Caps. Only when you have an abundant supply of easily absorbed, full spectrum minerals can you have strong, healthy teeth. That’s why we recommend taking the Quantum Trio daily – for the whole family.

Ingredients of the Dental Detoxifier

Therapeutic, unheated, grade 10 volcanic clay (*rich in a broad spectrum of naturally occurring trace minerals*), unheated, grade 10 Indian Shilajit (*a natural mineral resin formed in India’s high mountainous areas, rich in humic and fulvic acids*), Carbon-matrix Humate (*rich in humic and fulvic acids*), Premium-Grade Japanese Coral Minerals (*rich in ionized calcium, magnesium, trace minerals*); Broad-Spectrum of Grade 10 Phytonutrients: Ayurvedically processed Indian Noni (fruit, seed)(*Morinda citrifolia*), Soma Latha (stem) (*Sarcostemma acidum*), Siberian Maral Root (*Rhaponticum carthamoides*), Arctic Root (*Rhodiola Rosea*), Rhodiola Crenulata (root) (*also called Tibetan Ginseng*), Nopal Cactus (whole) (*Opuntia ficus indica*), Wild Pacific Yew (needle tips) (*Taxus brevifolia*), South American Slippery Elm (bark) (*Ulmus fulva*), South American Black Walnut (shell) (*Juglans nigra*), European Thyme (herb) (*Thymus vulgaris*), Indian Coriander (*Coriander sativum*), grade A Japanese Chlorella, premium-grade, fermented Japanese Green Tea, non-irradiated (*Camilla sinensis*), Wild Blue Green Algae, low-temperature, air-dried (*Aphanizomenon flos-aquae*), FOS (*fructooligosaccharides, chicory source*), Fermented Mycelial Mushroom Extracts of Premium-Grade, Mountain-Grown *Ganoderma lucidum* (Reishi), *Coriolus versicolor*; *Hericium erinaceus*; Indian Guggulipids (*Commiphora mukul*), Italian Olive Leaf Extract (*Olea eur.*), Organic Aloe Vera (*200:1 concentrate, full range of active polysaccharides as found in fresh aloe*), organic *Citrus Aurantium* (*non-irradiated*), calcium-based Montmorillinite, Oat Bran (*15% beta glucans*), CLA (*Conjugated Linoleic Acid, vegetable source*), Stabilized Rice Bran (*over 100 different antioxidants*), Stabilized Rice Protein, plant-based enzymatic base.
