Wild Reishi
Famous Herb Of Royalty For Power, Super Health And Long Life

So effective is Reishi that it is officially listed by the Japanese Government as a substance to treat cancer.

Cancer Case Histories

- **39 year-old woman with advanced breast cancer** with complications was diagnosed as terminal. She began taking large amounts of Reishi. After 6 months, the cancerous tumors were entirely gone. Exploratory surgery revealed only scar tissue where the tumors had been.

- **50 year-old woman had surgery for breast cancer**. When it later metastasized to her lungs, she was diagnosed as terminal. She began taking large amounts of Reishi. After 6 months, medical tests showed no evidence of cancer in her lungs.

- **60 year-old man with pancreatic cancer**, a typically fast-moving fatal disease, made a complete recovery by taking Reishi daily.

- **57 year-old man with stomach cancer** began taking large amounts of Reishi daily and completely recovered. He was still in remission 5 years later.

Hepatitis and Liver Disease

Chronic hepatitis, as with many liver diseases, is difficult to treat and often ends in premature death. One study of people with chronic hepatitis showed that Reishi was effective in 71 to 98% of the cases. Reishi contains a special factor, ganodosterone, which is a liver function stimulant and liver protectant. Promising research shows that Reishi helps regenerate the liver. Because of its dramatic healing effects on both the immune system and the liver, Reishi is now used as the herb of choice by many doctors for hepatitis of all types, chronic fatigue, candidiasis, and arthritis.

Worldwide Reishi Research

- **Priceless**: Valued more than gold in ancient times
- **Immunity**: Boosts the weakened immune system (as seen in cancer, candida, chronic fatigue, heart disease, bronchitis, asthma, diabetes, allergies)
- **Cancer**: Used extensively with all types of cancer (cancer of the breast, prostate, lung, pancreas, etc.)
- **Brain**: Helps improve memory, concentration, clarity, helps clear depression, anxiety, insomnia.
- **Liver**: helps regenerate the liver; helps clear hepatitis and liver diseases
- **Women**: helps clear PMS and menopause symptoms
- **Allergies, Candida**: Helps clear allergies and fungal overgrowth

The Greatest Herb In History
From ancient times, legends were told of a miraculous herb so powerful that those who could obtain it could overcome the worst, most life-threatening disease. This herb was said to give you the strength and agility of a young person and to let you live far beyond your normal life span. Even today, the reputation of this herb is greater than almost any other in history, yet most doctors have never even heard of it. It is called Reishi (in Japan) or Ling-zhi (in Chinese). It’s scientific name is Ganoderma lucidum. Reishi is classified as “A-one Medicine” in China. In the Orient, Reishi is treasured more than gold.

Master Terminator Of Infection
Reishi is a master eliminator of harmful bacteria such as staph, strep, E. coli and bacillus pneumoniae. In one amazing study, researchers gave mice a fatal injection of E. coli. In the control group, which received no Reishi, 100% died. In the group of mice which were given Reishi 48 hours previously to the fatal infection, 85% lived! No wonder Reishi is unrivalled in its long history as the most powerful of all herbs to give you a long, healthy life: it has a dramatic ability to greatly strengthen the immune system.

Head That Cold Off With Reishi
Reishi contains unique, rare polysaccharides which have been proven to increase the RNA and DNA in the bone marrow, where your body makes B cells. Studies show that Reishi strengthens both B cells and T cells. These specialized cells are a critical part of your internal army that fight infection. Studies show Reishi increases the strength and life span of all the white blood cells, the cells that fight infection. What an incredible boost to a sagging immune system! Many doctors recommend Reishi at the first sign of any cold, flu or sore throat to help quickly stop the infection. Better yet, take Reishi daily as your best insurance for a super healthy life.

Superb PH Balance: Organic Germanium
A key element in Reishi is its large amount of organic germanium, up to 2,000 ppm, 6 times more than even ginseng. Organogermanium can dramatically increase the oxygen absorbed by your blood. High oxygenation turns an acid body back to alkaline. Candida and cancer thrive only in an acid body. Organogermanium not only upregulates oxygen but also helps clear toxins.

Viruses: The Wrong Kind Of Friends
Typically present with candida or cancer are “bad friends,” such as harmful bacteria and viruses. The internal conditions that have allowed the disease to flourish offers a great breeding ground for other undesirables. Research shows that Reishi can stop viruses by helping your body to increase its own production of interferon, a powerful anti-viral substance. In one study, Reishi provided 90% protection to cells even against deadly viruses such as Vaccinia.

Liver Regeneration
Promising research shows that Reishi helps regenerate the liver. In one study, mice were given a lethal dose of the pain-killer, Indomethacin. In the control group, which received no Reishi, 90% of the mice died. In the second group which received Reishi, 100% lived! Reishi helps accelerate the clearance of drugs and chemicals from the body, thus helping the liver to detoxify faster. Reishi is the ultimate Phase I and Phase II liver detoxification tonic.

Beating Chronic Hepatitis
Chronic hepatitis is very difficult to treat. This disease may plague people for years, slowly eroding their health, often leading to premature death. One study of people with chronic hepatitis showed that Reishi was effective in 71 to 98% of the cases. Reishi contains a special factor, ganodosterone, which is a liver function stimulant and liver protectant.

Conquering Depression
Reishi has profound effects on the mind. Reishi is well known for its calming and mood-altering effect. That’s why it’s a world-class herb to help clear depression. Impaired liver function, poor nutrition and infection are often at the root cause of depression, anxiety and irritability. Depression can also be caused by food allergies. Research shows Reishi’s dramatic help in clearing food allergies. Reishi revitalizes the blood and helps normalize IgG, an immunoglobulin responsible for triggering many food allergies.

The Source Is Everything
Most Reishi currently on the market is commercially grown, solvent-extracted and often the wrong species. Poor quality Reishi will not produce the powerful healing benefits as seen in the research. We found the very best results with wild, mountain-grown Reishi from China, unpolluted with chemicals, additives or solvents.
